

TECHNOVA PVT. LTD.

INFORMATION SECURITY POLICY

Document ID	TN-SEC-001
Version	1.0
Effective Date	01 January 2026
Document Owner	Information Security Department
Classification	Internal Use

1. Purpose

This policy defines basic information security responsibilities for all TechNova employees.

2. Confidential Information

- Customer information
- Source code
- Business plans
- Financial information
- Employee information
- Credentials
- Product designs
- Internal reports
- Contracts

3. Password Security

Employees must keep passwords confidential.

4. Multi-Factor Authentication

Employees must use multi-factor authentication where required by company systems.

5. Phishing

- Unexpected emails
- Links
- Attachments
- Login requests
- Password-reset requests

- Payment requests

6. Data Sharing

Company confidential information must only be shared with authorized individuals who have a legitimate business need.

7. Remote Work Security

- Use company-approved devices.
- Protect their workspace.
- Avoid discussing confidential matters in public locations.
- Use approved company systems.
- Follow authentication requirements.

8. Security Incident Reporting

- Lost laptop
- Stolen device
- Accidental data sharing
- Suspicious email
- Unauthorized account access
- Malware infection
- Credential exposure

9. Public Wi-Fi

Employees should avoid accessing sensitive company systems over unsecured public networks unless approved security controls are active.

10. Clean Desk

Employees should avoid leaving confidential documents unattended in public or shared areas.

11. Example

If an employee accidentally sends a confidential document to the wrong external email address, the incident should be reported to Information Security immediately.

12. Important Rule

Prompt reporting of a security incident is more important than attempting to resolve the incident independently.

13. Contact

Security incidents should be reported through the TechNova Information Security incident-reporting channel.
