

IT Acceptable Use Policy

Document ID: NT-IT-001 | Version: 1.0 | Effective: 01 January 2026

Owner: Information Technology | Classification: Internal Use

1. Purpose

This policy establishes acceptable use requirements for Novatrix Technologies information technology resources, company devices, software, credentials, data, and network services.

2. Company Devices

Company IT assets may include laptops, desktops, monitors, mobile phones, headsets, and other equipment assigned for business use.

Device assignment is based on role, business requirements, security requirements, and operational needs.

3. Lost or Stolen Devices

Lost or stolen company devices must be reported to the IT Helpdesk immediately. Employees should provide relevant information about when and where the device was lost or stolen.

4. Software

- Only authorized software may be installed on company devices.
- Employees must not install unlicensed or unauthorized software.
- Software required for business work should be obtained through approved channels.
- Employees should not disable security controls to install or run software.

5. Passwords and Authentication

- Passwords must be kept confidential.
- Employees should use strong passwords and follow company authentication requirements.
- Passwords must not be shared with colleagues or external parties.
- Credentials must not be stored in publicly accessible locations.
- Multi-factor authentication must be used where required.

6. Company Data

Company data should be stored, processed, and shared only through approved systems and services.

7. Personal Use

Limited personal use of company IT resources may be permitted when it does not interfere with work, create security risks, violate policy, consume excessive resources, or involve illegal activity.

8. Removable Storage

Removable storage should be used only for legitimate business purposes and must comply with applicable security controls.

9. Returning IT Assets

Employees must return company devices and other IT assets when employment ends, equipment is replaced, a role changes, IT requests return, or the asset is no longer required.

10. Example

If an employee loses a company laptop while traveling, the employee must immediately contact the IT Helpdesk and follow the incident-reporting process.

11. Frequently Asked Questions

Q: Can I install any software I want?

A: No. Software installed on company devices must be authorized and appropriately licensed.

Q: What should I do if my company laptop is stolen?

A: Report it to the IT Helpdesk immediately and follow the security incident process.
